

NEW PRODUCT FROM ROADCREW

The Seecode Wheel is a fully integrated Bluetooth Hands-free device, which fits easily to your steering wheel. Its unique, stylish and ergonomic design sets new standards, in Bluetooth hands free car solutions. The position of the clear display, microphone, operating buttons and dual speakers, allow fast call handling with crystal clear sound quality. Installation is quick and easy taking only a few seconds. It has a high power battery providing long talk and standby times. The device links to your mobile phone book. You can make or receive a call without touching your mobile phone or removing your hands from the wheel.
